March 22, 2007

Education That Works For a Lifetime

Carrie E. Vibert, Director Legislative Program Review and Investigations Committee State Capitol, Room 406 Hartford, CT 06106

Dear Ms. Vibert:

The Community Colleges appreciate the commitment of the Program Review and Investigations Committee in the investigation and subsequent recommendations regarding improvement of the delivery of adult education and literacy in Connecticut.

The Connecticut Community Colleges offer two-year associate degrees, short-term certificate programs, skill building and personal interest courses in over 100 career-related areas. The twelve Community Colleges and their outreach programs serve nearly 50% of the undergraduates in public higher education in Connecticut with nearly 46,500 students enrolled in credit courses in the fall of 2006. This includes more than two thirds of the African American and Hispanic undergraduates enrolled at public institutions of higher education. Thirty-two percent of credit enrollments in fall 2006 were students over the age of 28, illustrating the system's significant role in preparing a skilled workforce to support the state's economic development. Many of the colleges' programs are specifically developed for the state's businesses and industries, state agencies, and community-based organizations. Over 38,000 individuals were served during 2005-2006 in non-credit skill-building, personal interest, or community service programs, forty-six percent of which were related to improving workforce skills. A wide range of both credit and non-credit programs, many sponsored by Connecticut business and industry to improve the skills of their employees and the productivity of their businesses, address education and training needs through programs ranging from basic skills in math and English to the latest technologies in healthcare and manufacturing.

There are a number of national initiatives, in which the Connecticut Community Colleges are currently involved, including Achieving the Dream, Making Opportunity Affordable, and grants from the U.S. Department of Labor to name just a few, that are considering best practices and learning strategies that will serve the needs students for access to the opportunities offered by higher education. We would encourage the Adult Literacy Board being created to address issues related to adult literacy to undertake a collaborative effort in Connecticut that would involve the institutions and agencies, both public and private that have experience in providing education, higher education, developmental education, English as a Second Language, and literacy support services. This collaboration will allow the Adult Literacy Board to derive benefit from the experience of these groups in similar national initiatives and in encouraging effective teaching and learning techniques, including instructional technology and its potential for scalability. Beyond this we urge the Adult Literacy Board to consider fully the resources necessary to support and improve student success as well as adult literacy.

Sincerely,

Marc S. Herzog Chancellor

Mace I. Henry

STATE OF CONNECTICUT

STATE BOARD OF EDUCATION

March 12, 2007

Ms. Carrie E. Vibert, Director Legislative Program Review and Investigations Committee State Capitol – Room 506 Hartford, CT 06106

Dear Director Vibert:

The attached represents the State Department of Education's response to your committee's report on Coordination of Adult Literacy Programs. Our comments and concerns about specific recommendations are indicated on the attached pages.

If you have further questions, please contact Paul Flinter at (860) 807-2050 or <u>paul.flinter@ct.gov</u> or George Dowaliby at (860) 807-2004 or <u>george.dowaliby@ct.gov</u>.

Sincerely,

George A. Coleman, Interim Commissioner

Department of Education

GAC/gpd/f

Connecticut State Department of Education

Response to the Report on the Coordination of Adult Literacy Completed by the Legislative Program Review and Investigations Committee

To promote effective coordination of adult literacy programs, program review committee recommends:

1) Adoption of a vision and mission statement that clarifies the purpose of adult literacy programs and services in Connecticut, emphasizing the goals of helping adults develop the literacy skills they need to function as productive citizens in work, family, and community

The Connecticut State Department of Education (SDE) derives its vision and mission for all its adult education and literacy services from the following sources.

The federal Workforce Investment Act (WIA), P.L. 105-220 clearly articulates that the purpose of adult education and literacy services is to:

- assist adults to become literate and obtain the knowledge and skills necessary for employment and self-sufficiency;
- assist adults who are parents to obtain the educational skills necessary to become full partners in the educational development of their children; and
- assist adults in the completion of a secondary school education.

Connecticut General Statutes (CGS) Section 10-5, and Sections 10-67 through 10-73d as amended, mandate the provision of adult education instructional services in the areas of citizenship, English-as-a-Second Language, basic education, and high school completion to Connecticut residents.

The State Board of Education's position statement on adult education (dated October 9, 2002) begins by expressing the Board's commitment "to quality adult education programs which are accessible to all Connecticut adults and lead to mastery of the essential proficiencies needed to function as productive citizens in work, family and community environments." While recognizing the unmet need for adult education services in Connecticut, it further describes three critical priorities for the adult education system that include increased accessibility to services, enhanced quality, and rigorous accountability.

These clear and comprehensive statements of purpose and vision directly guide the State Department of Education's work around adult literacy and define the mission for the State of Connecticut.

Development of a three-year strategic plan that defines roles, identifies
priorities, and directs funding for an adult literacy service system in
Connecticut.

The SDE is required by the Workforce Investment Act to submit a multi-year State Plan for Adult Education and Family Literacy. The last multi-year plan that was submitted in 2000 continues to serve as the SDE's current planning vehicle. At that time, the SDE formed a Planning Committee to focus on redesigning adult education and literacy services in response to the WIA, increasing collaboration among public and private sector stakeholders, and drafting the needs assessment, performance measures and strategies sections of the new state plan. This Planning Committee included representatives from the workforce development system, higher education, labor, social services, economic development, local adult education providers, literacy volunteers, corrections, and the State Librarian.

When WIA is reauthorized, a new multi-year plan will be required at which time the SDE will convene a similar planning group. The additional three-year strategic plan that is being recommended here references many of the same elements that will be addressed as part of the Department's new state plan for WIA. The cap on state adult education appropriation continues to limit the Department's efforts around fostering greater collaboration and increasing adult literacy services.

3) Establishment of an adult literacy leadership board consisting of nine voting members appointed by the governor and the legislature. The governor shall appoint five members including the chairperson. The speaker of the House of Representatives, the president pro tempore of the Senate, and the minority leaders of the House of Representatives and the Senate shall each appoint one member.

Currently within the State of Connecticut, there are two Boards appointed by the Governor that review and guide the Department's work around adult education and literacy:

- The State Board of Education which oversees the Connecticut adult education system has articulated a vision for high quality adult education services. This Board is appointed by the Governor with the advice and consent of the General Assembly; and
- 2. The Connecticut Employment and Training Commission (CETC), another Governor-appointed Board, is authorized by the legislature to review and improve the coordination of employment and training programs in their annual inventory, that includes adult education. Its 24 members include representatives from business, labor, state agencies, community-based organizations, and the general public. The SDE works closely with the CETC

and its staff to address many of the challenges identified by the CETC in its annual plan.

The creation of a new Adult Literacy Leadership Board as recommended above, seems somewhat duplicative and may delay the allocation of additional resources for work that has already been identified as critical, not only by the adult education system but also by the two aforementioned Governor-appointed boards. Membership in the two existing Boards could be expanded, if necessary, to accomplish the stated goals.

- 4) The program review committee recommends that under the direction of the adult literacy leadership board (the following points are a brief synthesis from the full report):
 - a. a statewide automated inventory of literacy services be established and maintained;
 - b. adult literacy service providers be required to maintain waiting lists;
 - c. state agencies work together to share data for research purposes and use systems to track progress and outcomes;
 - d. a state "report card" on the status of adult literacy in Connecticut be prepared and presented; and
 - e. at least two full-time education consultant positions be added to the adult education unit of the SDE.
- 5) The program review committee recommends that the board, through its strategic planning process:
 - a. establish that collaboration and community partnerships are the preferred way of delivering adult literacy services and identify ways to modify program requirements to promote shared funding and funding flexibility; and
 - b. develop funding policies that provide a) incentives for community partnerships of adult literacy providers and regionalized service delivery and b) financial support for regional collaboration and community planning.
 - c. In addition, it is recommended that the legislature, with the advice of the adult literacy leadership board, establish a new funding source for adult education and other adult literacy program providers that provides state

bonus grants for good performance outcomes, including but not limited to, effective collaboration and coordinated funding and service delivery. The board should also develop a policy for providing multi-year funding to programs with records of good performance.

Within available resources, the SDE already carries out many of the activities outlined above. The SDE is willing to work with the State Board of Education and the CETC to perform any additional functions that may be necessary. As previously stated, the cap on state adult education appropriation greatly limits the Department's ability to expand and fund effective collaborations, community partnerships, and regionalized service delivery models.

The Committee's support for increased SDE staff within the adult education unit is much appreciated.

STATE OF CONNECTICUT

EMPLOYMENT AND TRAINING COMMISSION

March 9, 2007

Sen. Edward Meyer, Co-Chair Rep. Julia B. Wasserman, Co-Chair Program Review and Investigations Room 506 Capitol Building Hartford, CT 06106

Dear Senator Meyer and Representative Wasserman:

I write on behalf of my colleagues on the Connecticut Employment and Training Commission (CETC) to comment on the Program Review and Investigations Committee's recent report and recommendations concerning adult literacy. We appreciate the opportunity to submit our observations in the public record.

CETC is Connecticut's state-level workforce investment board, charged to provide policy guidance to the Governor and General Assembly on workforce issues and broad oversight of the state's workforce efforts. The majority of CETC members represent business, including leaders of the state's five regional workforce investment boards (WIBs). Representatives of state and local government, education, labor, and community-based organizations complete our membership. Professional staff support and technical assistance is provided by the Office for Workforce Competitiveness (OWC).

We share your concerns about the challenge of developing and maintaining a highly-skilled and highly-literate workforce as the engine of Connecticut's economic growth and future prosperity. In a recent strategic plan (enclosed) [we examined current demographic and economic development conditions and trends in Connecticut to suggest workforce policy choices and priorities on which the state should focus. Our wide-ranging analysis addresses the "dual economy" challenge confronting the state's competitive posture. It is strikingly similar to the findings and observations included in your committee report on adult literacy. Our plan calls attention to the need for increased availability of workplace-based literacy (including ESL) and basic math training, to help employers upgrade essential job-related skills of entry-level and/or low-skill employees. We believe it is critical to maximize the strategic impact of the state's adult workforce education efforts. We are gratified to know that the legislature appears ready to tackle these issues head on.

The Program Review and Investigations Committee staff is to be complimented on the quality and comprehensiveness of their adult literacy report. It provides a broad overview of the challenge in Connecticut, addressing the people affected, contributing factors, rele-

vant programs and services, resources and funding, and strategic options. CETC and our associates at OWC are pleased to have supported this effort. I know that OWC has provided advice and guidance to committee staff as their work has proceeded in recent weeks and months. We received a presentation from Ms. Jensen and her colleagues at our September 14, 2006 CETC meeting. We plan to invite them to return in the near future for an update and to discuss steps CETC might take to support the committee's recommendations.

The report's recommendations address the need for a clear sense of vision and mission for adult literacy programming in Connecticut, effective strategic planning, an oversight structure, accountability for results, and resources. I would offer several comments of a general nature concerning these topics for your consideration as you work to finalize your report and proceed with legislation.

I strongly believe any entity that might be established to provide strategic direction to the state's adult literacy efforts, as recommended in the report, should be led by businesses and employers.

We believe that in terms of vision and mission it is important to emphasize adult <u>workforce</u> literacy education. This is a workforce, economic development imperative, affecting adult workers (and prospective workers), requiring programming and dedicated resources that is separate from many of the traditional "adult education" programs offered at the local level.

I want to stress the importance of reaching out to and engaging the participation of Connecticut businesses and employers in these efforts. This is fundamentally a <u>workforce</u> challenge, and their views about what is required to succeed in the workplace, and their active engagement in helping to solve the adult literacy problem is essential. They need to be at all of the tables where planning is being conducted and where decisions are getting made. Business represents a majority of CETC's broad-based membership.

We are already on record in support of a proposal presented to us by the statewide Workforce Coordinating Committee (of adult education practitioners and advocates) to establish a dedicated revenue stream to support adult <u>workforce-focused</u> literacy education programming – separate and apart from funding already earmarked for local adult education efforts – as a strategic economic development investment. The principle of dedicated funding in this instance is sound.

As the state's business-led workforce investment board with broad oversight, planning and reporting responsibilities – whose members include the commissioners of education, higher education, economic and community development, labor, and social services; with the chancellor of the community college system and secretary of the Office of Policy and Management as ex-officio members; and staff support provided by OWC – CETC provides an existing vehicle that can serve as the proposed adult literacy leadership board.

CETC is already charged to develop and update periodically a statewide workforce strategic plan, including adult education. It would seem to make sense to insure that any strategic planning effort spawned by the committee's recommendations be linked to, or at least be consistent with, this mandated state planning undertaking. This is an opportunity for strategic synergy and consistency. A new state plan is already on the drawing board, for completion in the next several months, providing a specific opportunity for collaboration. The CETC, as part of it's on-going strategic planning process, can complete the important work articulated in Raise Bill No. 6998.

Again, we compliment you on your efforts in addressing this important issue. We appreciate the opportunity to weigh in. I hope these comments are useful. We stand ready to work with you and your colleagues going forward.

Sincerely,

Wallace Barnes, Chair

Wallac Farm

Copy: Sen. John A. Kissel, Ranking Member Rep. Mary M. Mushinsky, Ranking Member

March 13, 2007

Ms. Carrie E. Vibert, Director Legislative Program Review and Investigations Committee State Capitol, Room 506 Hartford, CT 06106

Dear Ms. Vibert:

Thank you for the opportunity to review and comment on the draft final report, "Coordination of Adult Literacy Program." I greatly appreciate the hard work of the Committee staff and their close cooperation with the CTDOL staff in the development of the draft final report as it pertains to our role in the coordination of adult literacy programs. Once again, the Program Review Committee has produced a very valuable document.

Addressing the needs of workers and potential workers is a major goal of the CTDOL. As this final draft comprehensively sets forth, future employment to a greater extent requires an advanced level of literacy, especially workforce literacy. The department works daily with public and private partners to help provide the literacy advancements our economy requires to be vibrant and grow. I believe that your report will prove a valuable tool in meeting the literacy challenges that face Connecticut.

I would like to make a formal response to certain parts of the report. My first comment is on recommendation three. I want to preface my remarks by saying that it is outside the usual course of the CTDOL comments that we did not offer the following opinion earlier in the process. This was because it was only after careful study of the report and discussion with the Office for Workforce Competitiveness (OWC) that the alternative we are suggesting became clear to us as the most appropriate one. We had not reached that conclusion earlier. We respectfully oppose recommendation three. We do not agree that a new entity needs to be created to address literacy. We believe that the Connecticut Employment and Training Commission (CETC) is the entity that can best serve to implement the other recommendations in the report, which we endorse.

The CETC is most suitably postured to bring the vision, so well enunciated in the report, to fruition. The CETC has been part of Connecticut law since 1992. It is the statewide Workforce Investment Board. By law, the Board is led by a representative of the business community and businesses must form the majority of its membership. Other members are representatives of state and local government, education, labor, community-based organizations, and the five regional Workforce Investment Boards (WIBs).

200 Folly Brook Boulevard, Wethersfield, CT 06109-1114 Ph: 860.263.6505 • Fx: 860.263.6529 • www.ct.gov/dol An Equal Opportunity/Affirmative Action Employer

Ms. Carrie E. Vibert March 13, 2007 Page 2

The CETC is required by law to provide policy guidance on all workforce matters to the Governor and the General Assembly. By utilizing the CETC, duplication would be avoided and all entities charged with workforce development would be at the table. All CETC processes are open and public input is regularly sought and received.

The CETC is especially appropriate for this purpose because over half of all individuals who are enrolled in adult education are of prime workforce age. In addition, the Workforce Investment Act (WIA) specifically targets our youth and older populations. Of the five performance measures of adult education, two are specific to the workforce and the other three directly prepare individuals for workforce entry. We are aware that the OWC is responding to the final draft similarly. We are in agreement with the OWC.

I would also like to comment on a few other items in the draft report:

- In 1994, the CTDOL was successful in winning a federal "One-Stop" grant. With it we began to put in place what is now the Connecticut One-Stop Career Center System. We accomplished this by inviting our partners to join us; especially our key partners, the WIBs. The CTDOL still provides the majority of the funds utilized in the operation of the One-Stops. We commonly number the One-Stops at fourteen. We understand that the report numbers them at twenty, a number that includes sites which we do not consider full One-Stops.
- The CTDOL operates the Jobs First Employment System (JFES), Connecticut's welfare to work program. We have chosen to contract with the WIBs to secure case management for JFES clients. The WIBs provide this service through contracted local providers. Every JFES client receives a CASAS literacy assessment. All youth served by WIA now are required to receive a literacy assessment.
- Lack of a high school diploma is not necessarily an indication of a lack of literacy.
- We agree, as the report so succinctly notes, that further integration of data in the delivery system will enable Connecticut to provide a better level of service to our clients. At present our interactive data system includes data for clients of the JFES program, the federal Wagner-Peyser Act (the public-private labor exchange), and WIA data. We hope to soon add federal Trade Act data.
- The report correctly places emphasis on the six and one-half million dollars in TANF reorganization funds appropriated in the 2006 session of the General Assembly. These dollars were in addition to the approximately sixteen million dollars appropriated to the JFES program. These monies are utilized together in provision of services to JFES clients.

Ms. Carrie E. Vibert March 13, 2007 Page 3

- The reference to \$3.4 million expended by the WIBs for literacy seems to be the money provided the WIBs through TANF Reorganization funds. If that is correct, only a portion of these funds are expended for literacy services.
- The CTDOL, pursuant to Connecticut law, protects individual personal earnings information
 provided to the department by employers pursuant to Connecticut's unemployment
 compensation law. Only public employees in the performance of their public duties may
 access this information and only with a strict confidentiality agreement containing very
 substantive penalties. It is a matter of law not policy.

Thank you again for the opportunity to review and comment on this report.

Sincerely,

Patricia H. Mayfield Commissioner

APPENDIX B. ADULT LITERACY ACRONYMS AND DEFINITIONS

ABE	Adult Basic Education
AEFLA	Adult Education and Family Literacy Act (Title II, P.L. 105-220)
AHSCDP	Adult High School Credit Diploma Program
ASE	Adult Secondary Education
ATDN	Connecticut Adult Training and Development Network
CAACE	Connecticut Association for Adult and Continuing Education
CASAS	Comprehensive Adult Student Assessment System
CARS	Connecticut Adult Reporting System
CCS	Connecticut Competency System
CETC	Connecticut Employment and Training Commission
CREC	Capital Region Education Council
DOL	Connecticut Department of Labor
DSS	Connecticut Department of Social Services
EDP	External Diploma Program
ESEA	Elementary and Secondary Education Act (P.L. 103-382)
ESL	English as a Second Language
GED	General Educational Development test
JFES	Jobs First Employment Services
LEP	Limited English Proficiency
LV	Literacy Volunteers
NAAL	National Assessment of Adult Literacy (2003)
NGA	National Governors Association
NIFL	National Institute for Literacy
NRS	National Reporting System for Adult Education
NSAL	National Survey of Adult Literacy (1992)
OVAE	Office of Vocational and Adult Education, U.S. Department of Education
OWC	Connecticut Office of Workforce Competitiveness
RESC	Regional Education Service Center
SDE	Connecticut State Department of Education
TANF	Temporary Assistance for Needy Families
TFA	Temporary Family Assistance
U.S. DOE	U.S. Department of Education
U.S. DOL	U.S. Department of Labor
WIA	Workforce Investment Act of 1998 (P.L. 105-220)
WIB	Workforce Investment Board

APPENDIX C. STATE AND FEDERAL ADULT LITERACY LAWS: MAJOR PROVISIONS

Connecticut State Statutes

In Connecticut, all school districts are statutorily required to offer adult education instruction to eligible residents that includes: Americanization and United States citizenship; English for adults with limited English proficiency; and elementary and secondary school completion programs and classes. Districts may provide adult education classes on any subject and vocational education area included in their elementary and secondary school curriculum as well as adult literacy, parenting skills, and any other subject or activity.

Credit requirements. Districts may award adult education diplomas to students who have satisfactorily completed a minimum of 20 adult education credits in certain academic and elective areas. As of July 1, 2004, the credit requirements by statute are: four credits in English; three credits in mathematics; three credits in social studies including one credit in American history and at least one-half credit in civics and American government; two credits in science; and one credit in the arts or vocational education. State law specifically allows adult education credits to be awarded for the following:

- experiential learning (e.g., military experience, occupational experience including training, community service, or avocational skills);
- successful completion of course work at state-accredited higher education institutions and approved public and private high schools and vocationaltechnical schools;
- satisfactory performance on subject matter tests; and
- independent study projects.

District authority. Each school district must determine the minimum number of weeks per semester for an adult education program. The district is further required to provide certified counseling staff to assist adult education program students with educational and career counseling. Local and regional boards of education providing adult education classes and activities are required to provide rooms and other facilities and employ necessary personnel. The boards have the same powers and duties in relation to adult education classes as with other public schools

Students. Adult students may be admitted to any public elementary or secondary school to attend adult education classes. Persons enrolled in a full-time educational program in a local or regional school district must obtain the approval of the school district principal to enroll in an adult education activity.

An adult resident is statutorily defined as: (1) any person 16 years or older who in not enrolled in a public school program; (2) a student expelled from a public school for seriously disruptive conduct involving the use of alcohol and subsequently assigned to an adult class; or (3) a public school student who is under 16 and a mother and requests permission from the local or regional board of education to attend adult education classes.

Adult education providers. All local and regional boards of education are required to establish and maintain adult classes or provide through cooperative arrangements with other boards of education, cooperating eligible entities, or regional educational service centers for participation in adult classes for adult residents. A cooperating eligible entity is defined by statute as any corporation or other business entity, nonprofit organization, private occupational school, licensed or accredited institution of higher education, regional vocational-technical school, or library that enters into a written cooperative arrangements with a local or regional board of education or regional educational service center to provides adult education classes or services.

Regional educational service centers (RESCs) are education agencies formed by four or more local or regional boards of education in a state regional planning area to cooperatively provide services and programs. ¹ RESCs often provide special education services, while some operate inter-district magnet schools and adult education programs for their member districts.

Fees and charges. Required adult education classes and programs in Americanization and United State citizenship, ESL, and elementary and secondary school completion programs must be provided free of charge to eligible adults. However, a providing school district can charge a registration fee to a cooperating district for that district's residents registered for required adult education classes. Further, adult students may be charged registration fees for nonrequired classes; for these classes, providing school districts may charge a higher registration fee for residents of a cooperating school district than it does for its own residents.

A board of education for any providing school district may also set and collect student fees for books and materials or require a refundable deposit for the lending of books and materials for an adult education classes, activities, or programs. Fees may be waived for a handicapped adult or elderly person (at least 62 years) enrolled in adult education classes, activities, and programs in any subject provided by the elementary or secondary school including vocational education, adult literacy, parenting skills, and any other subject or activity. A board of education providing adult education may establish and maintain an adult education school activity fund to handle the finances of the program.

State grants. To be eligible for reimbursement through a state grant, school districts and RESCs are required to annually submit an adult education proposal to the Department of Education. SDE determines the format of the proposal, including a description of the program and an estimate of the eligible costs for the upcoming fiscal year. Local and regional school districts and RESCs are reimbursed a percentage of their eligible adult education expenses based on a statutory formula.

Eligible expenditures for adult education are broadly defined in statute as those directly attributable to the required adult education program including teachers and teacher aides, administration, clerical assistance, program supplies, facility rentals other than rooms and

in the Middletown and Eastern shoreline area.

_

¹ There are six RESCs statewide: (1) Area Cooperative Educational Services (ACES) in the New Haven area; (2) Cooperative Education Services (CES) in the Bridgeport area; (3) Capital Region Education Council (CREC) in the Hartford area; (4) EastConn in the Windham area; (5) Education Connecticut in the Litchfield area; and (6) LEARN

facilities specifically for adult education classes and activities, staff development, counselors, transportation, security, and child care services.

The percentage of eligible costs for adult education is determined based on a ranking for all towns in a descending order from 1 to 169. All towns are ranked based on their adjusted equalized net grand list per capita. A reimbursement percentage on a continuous scale of 0 to 65 is determined for each town. Priority school districts have a guaranteed floor (not less than 20 percent) built into their reimbursement formula and large schools and those providing basic adult education to Department of Mental Health and Addiction Services clients are given inceases up to a certain ceiling.

Federal Law

Federal legislation concerning adult literacy was first enacted in the mid-1960s as part of the national anti-poverty programs initiated during the Kennedy and Johnson administrations. Recognizing the link between economic success, effective community participation, and an individual's literacy level, Congress created a grant program to support state adult basic education activities under P.L. 88-452, the Economic Opportunity Act of 1964. The current federal adult literacy law, The Adult Education and Family Literacy Act (AEFLA), was enacted as Title II of The Workforce Investment Act of 1998 (WIA), Public Law 105-220.

Purpose. The main purposes of AEFLA, according to Section 202 of P.L. 105-220, Title II, are to: "...

- assist adults to become literate and obtain the knowledge and skills necessary for employment and self-sufficiency;
- assist adults who are parents to obtain the educational skills necessary to become full partners in the educational development of their children; and
- assist adults in the completion of a secondary school education."

Under AEFLA, "literate" means an individual is able to read, write, and speak in English, compute, and solve problems, at levels of proficiency necessary to function on the job, in his or her family, and in society. The federal definition does not establish any specific educational competency level or single, national literacy standard for adults.

Funding. Federal AEFLA funds are distributed to states according to a formula based on census data on the number of adults age 16 and over who lack a high school diploma and are not enrolled in school. In FY 05, all state Adult Education and Family Literacy Act grant awards totaled nearly \$560 million and Connecticut received almost \$5.8 million

A 25 percent state match (state and local monies combined) is required and states must also sustain their overall level of spending (maintenance of effort) on adult literacy services. The maintenance of effort requirement applies to aggregate and per-pupil spending and states can face reduced funding allocations for noncompliance.

Most states exceed the 25 percent matching level and Connecticut's state-local contribution typically is among the highest in the country. In FY 02, Connecticut's nonfederal share of total spending on adult education and literacy was 85 percent.

States must award at least 82.5 percent of the federal grant on a competitive basis to local providers of adult education and literacy services. The federal law prohibits states from using more than 10 percent of their AEFLA funding for the education of correctional facility or other institutionalized populations.

The local provider network may include local education agencies (LEAs)/school districts, community colleges, and a variety of community- and faith-based organizations and nonprofit agencies that provide literacy services. In awarding local funding, states must consider 12 statutory criteria that include factors such as: past effectiveness, commitment to serving those most in need, measurable goals, program intensity and duration, high-quality management information, flexible schedules, support services, and coordination with other available community resources.

States are allowed to establish additional criteria and set funding priority areas for their program activities. Currently, Connecticut has identified six federal funding priority areas that include, among others, projects related to workforce preparedness, programs to improve family (parent and child) literacy, and services that promote the transition from adult education to post-secondary education and training.

The state administrative agency can retain up to 17.5 percent of the federal grant, with a maximum of 5 percent for administration and 12.5 percent for leadership activities, which are statewide program improvements such as professional development and technical assistance. In Connecticut, the State Department of Education (SDE) is the agency authorized to administer AEFLA. As the administering and supervising entity, SDE must prepare a state five-year plan for providing adult education and literacy services, monitor and report on program performance, distribute funds to local providers and provide statewide leadership.

Activities. Providers must use federal AEFLA funds to operate programs that provide services or instruction in one or more of the following categories:

- Adult education and literacy services, including workplace literacy services;
- Family literacy services; and
- English literacy services.

Under the federal law, adult education is defined as instruction below the postsecondary level for persons age 16 or older and not enrolled in secondary school who do not have a high school diploma or equivalent level of educational skills, or competency in reading, writing, or speaking English. Workplace literacy services are basic skill and ESL instructional activities offered with the purpose of improving worker productivity through improved English literacy skills. Family literacy programs integrate parent and child literacy activities including early childhood and adult education programs, parent training, and interactive literacy activities between parents and their children.

In addition to literacy programs, local providers may, and many do, offer a variety of related support services such as job placement, child care, and transportation assistance. However, such activities are usually funded from sources other than AEFLA grant money.

Performance standards and reporting. Improving accountability for the results of publicly funded employment, training, and literacy programs was a central goal of the 1998 federal workforce investment reform legislation. Under the provisions of AEFLA, there are three core indicators for assessing state performance of adult literacy activities on an annual basis:

- demonstrated improvements in literacy skill levels;
- placement or retention in, or completion of, postsecondary education, training, unsubsidized employment or career advancement; and
- receipt of a secondary school diploma or its recognized equivalent.

The federal adult education law required the U.S. Department of Education, Office of Vocational and Adult Education (OVAE), to create a National Reporting System (NRS) on outcomes from state adult education and literacy activities. The reporting system developed by OVAE, which became effective in July 2000, establishes five core measures for assessing the AEFLA performance indicators as well as standardized definitions and data collection methodologies states must use to ensure comparable and reliable information. (The core NRS measures, their working definitions, and the assessement method and reporting process used in Connecticut are described in Appendix D).

Each year, states must negotiate targeted levels of performance for each NRS measure and report progress toward their goals to the U.S. DOE. States that meet or exceed their adult literacy activity goals as well as their performance goals for other WIA-funded employment and training programs can qualify for federal incentive grant funding.

Source of Data: GAO Report 04-657 (WIA: State and Local Areas Hve Developed Strategies to Assess Performance but Labor Could Do More to Help, June 2004).

The federal core indicators for WIA Title I employment and training programs that serve adults, youth, and dislocated workers are listed in Table 1. For the most part, they focus on employment rates, credential rates, and changes in the earnings of individual participants. The indicators regarding skill attainment and high school completion, which are comparable to AEFLA core measures, were recently added for the WIA programs that serve youth age 14-18.

Required coordination. Another central goal of the 1998 WIA reforms was to integrate workforce development services through a system of community-based "one-stop" career centers. The centers were intended to give jobseekers and employers in a local labor market area access to many employment, training, and education resources at one site.

To promote collaboration and coordination, WIA requires certain federal programs, including those funded under the Adult Education and Family Literacy Act, to be mandatory "one-stop" system partners (see Table 2). By law, mandatory partners are required to: make their core services available at the one-stop centers; use portion of their funding to support the one-stop system; provide representation on the local workforce investment board; and enter into formal agreements (written memoranda of understanding, MOUs) with the local boards concerning these activities.

Table 2. Mandatory WIA One-Sto	p System Partners
Program	Federal Agency
Adult Education and Literacy (WIA Title II)	
Vocational Education (Perkins Act)	Dept. of Education
Vocational Rehabilitation	
Employment and Training for Adults, Dislocated Workers, and Youth (WIA Title I)	
Employment and training for migrants and seasonal farm workers	
Employment and training for Native Americans	
Job Corps	Dont of Labor
Older American Community Service Employment Program	Dept. of Labor
Trade adjustment assistance programs	
Unemployment Insurance	
Veterans' employment and training programs	
Employment Services (Wagner-Peyser Act)	
Welfare-to-Work grant-funded programs	
Employment and training funded by Community Services Block Grants	Dept. of Health and Human Services

APPENDIX D: NATIONAL REPORTING SYSTEM AND CASAS OVERVIEW

All states are required under the federal Adult Education and Family Literacy Act to report on five core measures of the effectiveness of their adult literacy activities. The mandated measures and their working definitions are shown in Table 1.

Table 1. Federally Mandated Mea	asures of Adult Literacy Program Effectiveness
AEFLA Core Measures	Definitions
Demonstrated Literacy Skill Improvement a. Education Gain Adult Basic and Secondary Education	Percentage of adults enrolled in basic literacy programs who acquired the basic skills needed to complete one or more
b. Educational Gain English Literacy	levels of instruction in which they were initially enrolled Percentage of adults enrolled in English literacy programs who acquired the level of English language skills needed to complete one or more levels of instruction in which they were enrolled
2. High School Completion	Percentage of adult learners with a high school completion goal who earned a high school diploma or GED after exiting the program
Entered Postsecondary Education or Training	Percentage of adult learners with a goal to continue their education who enter postsecondary education or training after exiting the program
4. Entered Employment	Percentage of unemployed adult learners (in the workforce) with an employment goal who were employed at the end of the first quarter after exiting the program
5. Retained Employment	Percentage of adult learners with a) a job retention goal at the time of enrollment and b) those with an employment goal who obtained work after leaving the program who were employed at the end of the third quarter after exiting the program
*ABE/ASE consists of programs covering six instruc	tional levels ranging from beginning literacy to high school

completion skills

Source of Data: U.S. Department of Education, 2006 AEFLA Annual Report to Congress on State Performance

States are required to use the National Reporting System (NRS), the AEFLA accountability process developed by the U.S. Department of Education, to report their core measures and other adult literacy activity data. NRS incorporates standard definitions and data collection methodologies to help ensure reliable, comparable performance data is gathered from all state programs

For the all but the first core measure, states can meet the NRS requirements by compiling outcome data based on program records (e.g., diplomas awarded, GED examinations passed), follow-up survey results, or cross-matches of different databases (e.g., adult education and labor/employment databases). Regarding the literacy skill improvement measure, states are required to establish standardized assessment procedures to identify the initial student proficiency as well as to measure gains from program participation. NRS defines six levels of levels of proficiency (Educational Function Levels) for adult basic and secondary programs, and

another six levels for ESL programs. The ABE/ASE levels are based on reading, writing, numeracy and functional and workplace skills while the ESL levels also incorporate speaking and listening skills.

The NRS Educational Function Levels for adult basic and secondary programs and for ESL programs are shown in Table 2. According to the U.S. DOE, one NRS level is roughly equal to two grade levels. The literacy skill improvement represented by advancing on Educational Function Level, therefore, is significant.

The NRS levels are benchmarked to common adult literacy assessments, such as the Comprehensive Adult Student Assessment System (CASAS) used by Connecticut, so that how students function at each level corresponds to their performance (score range) on such standardized tests. The CASAS test scores that correspond to each NRS level are also shown in Table 2. The highest number in each CASAS range is the benchmark test score used to identify learners who complete an NRS level.

	Table 2. NRS Educati	onal Function Levels	s
ABE/ASE NRS Levels	CASAS Score Range Reading/Math	ESL NRS Levels	CASAS Score Range Reading/Math/Listening
ABE Beginning	200 and below	Beginning	180 and below
Literacy		Literacy	
ABE Beginning	201-210	Beginning	181-200
Basic			
ABE Low	211-235	Low	201-210
Intermediate		Intermediate	
ABE High	236-245	High	211-220
Intermediate		Intermediate	
ASE Low	236-245	Low Advanced	221-235
ASE High	246 and above	High Advanced *	N/A

^{*} Connecticut's adult education system, like those in many other states generally does not serve individuals at a high advanced level of English language proficiency as they tend to be well-educated, with high literacy levels in their native language. These students typically would be referred to postsecondary-level ESL programs, such as those offered by community colleges. The ESL high advanced level is being eliminated from the NRS reporting system by U.S. DOE effective FY 07.

Source of Data: SDE, Bureau of Early Childhood, Career and Adult Education, *Connecticut Competency System Assessment Policies and Guidelines Fiscal Year 2005-2006*, September 2005.

CASAS. The Comprehensive Adult Student Assessment System is one of several nationally recognized tools for measuring adult literacy levels.² CASAS is approved by both the

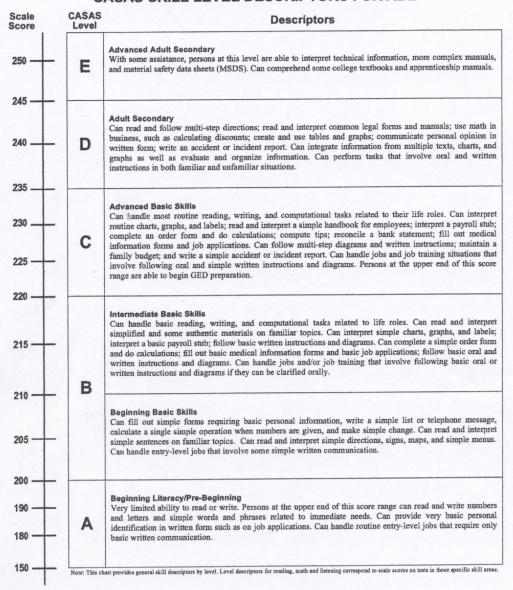

² Some of the other commonly used standardized adult literacy assessment tools are TABE (Test of Adult Basic Education) and ABLE (Adult Basic Learning Examination), both of which are scored using grade-level equivalents.

federal and state education departments for assessing the needs of adult learners and is widely used by state and local education agencies as well as many training program operators across the country. Connecticut is one of at least 30 states that uses CASAS for reporting on the federal core measures of adult education program performance.

CASAS assessment instruments measure literacy levels in terms of defined sets of critical skill sets (competencies) adult need in different contexts. There are about 180 different instruments available for a wide variety of assessment purposes including initial skill appraisal, course and program placement guidance, and diagnosis of instructional needs as well as to monitor and document learning gains and other student outcomes.

A general description of the literacy levels in terms of reading, writing, computational, and functional/workplace skills that correspond to CASAS test scores for both ABE (which CASAS uses to refer to both adult basic and adult secondary education programs) and for ESL students is attached. The five CASAS levels shown in the attachment, which range from A to E for adult basic and secondary education as well as English as Second Language, do not directly relate to the National Reporting System levels. However, federal educational function levels for adult basic and secondary education can be matched to the subcategory descriptions within all five CASAS skill levels for ABE. Similarly, the subcategories for the CASAS skill levels A through C for ESL also match up with the six NRS levels for English language proficiency.

APPENDIX G.

WORKFORCE INVESTMENT ACT: PROVISIONS FOR EMPLOYMENT AND TRAINING PROGRAMS

In Connecticut, the state Department of Labor is the designated administrative entity for the employment and training parts of the Workforce Investment Act (i.e., WIA Titles I and III), while the State Education Department is the designated entity for the act's adult education and literacy portion (Title II, the Adult Education and Family Literacy Act). The WIA programs overseen by the state DOL include: labor exchange services (also known as Wagner-Peyser services), which are job search, referral, placement and re-employment assistance as well as recruitment services for employers; and employment support and training programs for three categories of jobseekers. The three categories are:

- *adults* (persons 18 or older);
- *youth* (low-income persons age 14 through 21 who meet certain conditions that require assistance to complete their education or secure employment, such as deficient basic literacy skills, pregnancy, or homelessness); and
- *dislocated workers* (individuals who have been terminated or laid off from their jobs, or received termination or layoff notices, are eligible for or have exhausted unemployment benefits, are self-employed but unemployed because of general economic conditions, or are displaced homemakers).

WIA Title I services. Three sequential tiers of services, which must be provided through one-stop centers, are funded under WIA Title I: *core; intensive; and training*. Core services are primarily self-service activities and include job search and placement assistance, labor market information, as well as and information about training, unemployment and other benefits and supports (e.g., child care or transportation assistance). They are available to any jobseeker coming to a one-stop center.

Intensive services are available to individuals who complete one or more core services and are still unemployed or underemployed and may include: individual career planning and counseling, resume preparation, job clubs, internships, and comprehensive assessments. Persons who have received one or more intensive services as well as core services and are still unable to find a job may be eligible for WIA-funded employment training and education. By law, priority for WIA intensive and training services is given to public assistance recipients and other low-income individuals and to veterans.

Training. WIA-funded training services, for the most part, must be provided through Individual Training Accounts (ITAs), which operate like vouchers for vocational training and education services. Individuals can use their accounts to purchase training services from anyone on the eligible provider list prepared by the local workforce investment board for their area, as well as for tuition, books, supplies and other related training costs. Eligible training providers can include public or private training programs that meet state-established criteria, organizations that carry out certain apprenticeship programs, and post-secondary education institutions including two-year and four-year colleges and universities.

Connecticut WIA System Components

Connecticut's workforce investment system, as mandated by federal law, consists of a state administering agency, state-level and local-level workforce investment boards, an agency that staffs the state board, and a network of one-stop service delivery centers. Each major component is described briefly below.

Connecticut Department of Labor (DOL)

- State agency responsible for administering federal and state employment service, unemployment insurance, and employment and training program
- Regulates and enforces working conditions, wage standards, and labor relations
- Broad administrative role for WIA employment and training programs and directly operates Jobs First Employment Services (JFES), Connecticut's welfare-to-work program for eligible clients of the Temporary Assistance for Needy Families (TANF) program, which is administered by the state Department of Social Services

Connecticut Employment and Training Commission (CETC)/ State-level Workforce Investment Board

- Established by legislature in 1989 and replaced the state Job Training Coordinating Council, taking over its statewide coordinating duties mandated under the federal Job Training Partnership Act of 1978; given additional responsibility for reviewing and reporting on the success of state employment and training programs
- At present, functions as State Workforce Investment Board mandated under WIA; authorized under P.A. 99-195 to implement the federal act in Connecticut, serving as vehicle for developing state and local policies, processes and structures to achieve state workforce investment goals; within the state labor department until July 1, 2000, when transferred to the Office of Workforce Competitiveness (P.A. 00-120)
- By state law, comprised of 24 members with majority representing business and industry; remainder representing state and local government (current members include commissioners of education, higher education, economic and community development, labor and social services), organized labor, education, and community-based organizations; all members appointed by the governor from recommendations submitted by legislative leadership
- Required to develop and update the state's single five-year strategic plan for implementing the goals of WIA in consultation with the regional workforce investment boards (described below); additionally responsible for submitting recommendations to the governor and legislature on the appropriation of the state's federal WIA grant funding
- Required to develop, and include in its annual report to the governor and legislature, an education and job training report card that assesses the accomplishments of the state workforce investment system in accordance with federal accountability requirements

Office of Workforce Competitiveness (OWC)

- Initially established by Executive Order #14 (April 12, 1999), but made a statutory agency within the Office of Policy and Management for administrative purposes only under P.A. 00-192
- Purpose is to provide the governor with advice on workforce investment matters and coordinate the workforce development activities of all state agencies

- Must supply to the governor and legislature, with the assistance of the state labor department, necessary reports, information and assistance, drawing on any state agency for help, and serve as staff to support CETC and the JOBs Cabinet.
- Connecticut's JOBs Cabinet was also created by the governor under Executive Order #14
 as the implementation arm for CETC; chaired by OWC Director, other cabinet members
 include the commissioners of labor, economic and community development, education,
 and social services, the OPM Secretary and the Community Colleges Chancellor

Regional Workforce Development Boards/Local Workforce Investment Boards (WIBs)

- System of regional workforce development boards, based on business-led Private Industry Councils that had been established as part of earlier federal employment and training legislation created in Connecticut in 1992
- Regional boards now function as the local workforce investment boards mandated under WIA; each board also required by WIA to have a youth council
- Similar to CETC, business members must constitute the majority of regional board members and whenever possible, at least half of the business and industry representatives should be small businesses including minority businesses
- Nonbusiness members must include representatives of community-based organizations, state and local governments, state and local organized labor, human service agencies, economic development agencies, and regional community-technical colleges and other educational institutions including secondary and postsecondary institutions and regional vocational-technical schools
- Regional board members appointed by local elected officials from the service area; boards required to broadly represent the interests of the region's population including welfare recipients, persons with disabilities, veterans, dislocated workers, younger and older workers, women, minorities, and displaced homemakers; number of members on a regional board in Connecticut ranges as high as 80
- In accordance with state and federal law, the regional boards plan and coordinate workforce investment programs and services at the local level within their region in partnership with local elected officials; boards have oversight, planning, policy-making and funding authority for regional workforce investment activities.

Connecticut Works (CTWorks) Centers/One-Stop Centers

- Statewide network of job centers offering comprehensive workforce development assistance to workers, students, and employers known as *Connecticut Works*; in place before one-stop employment and training delivery systems were federally mandated by the 1998 Workforce Investment Act (See P.A. 94-116)
- 20 CTWorks centers operate throughout the state under the direction of the regional workforce boards in partnership with DOL and serve as the state's WIA one-stop system.
- Provide full array of employment services to jobseekers job referral, job search, job development, and career workshops; customers who meet eligibility requirement of WIA programs for adults, youth, and dislocated workers, or are JFES program participants, can receive individualized career guidance and financial assistance for job training
- For employers, one-stop centers will assist with employee recruitment and job applicant screening and provide labor market and information on tax credits and other job-related assistance for businesses; if certain federal requirements are met, employers may be eligible for customized and on-the-job training programs.

APPENDIX H. SDE 2006-2007 PRELIMINARY Adult Education Reimbursement Percentages Based on Current Law

APPENDIX J Survey of Connecticut Adult Education Program Providers (October 2006)

Your Program Name: [SENT TO 47 PROVIDERS; 33 SURVEYS RETURNED (70% response rate)]

- 1. Do you maintain a formal waiting list for your mandated adult education classes? 22 yes 11 no (n=33)
- 2. At present, how many individuals are waiting for an opening to participate in your mandated adult education programs and how many are participating? Please provide the information below, if available:

Information as of	2006 (date)	ABE	GED	CDP	EDP	ESL
Total Number Particip	ating in Classes	2-278	3-285	44-1,210	0-44	6-1,496
(rar	ige of responses)	n=27	n=28	n=21	n=14	n=26
Total Number Wa	iting for Classes	0-92	0-44	0-46	0-5	0-315
(ran	nge of responses)	n=16	n=17	n=15	n=9	n=19

3. For your Fall 2006 program schedule, have you added classes or increased class sizes to accommodate student demand for your mandated adult education programs? Please check all that apply.

Added Class(es): 18 (n=30)	<u>12</u> ABE	<u>3</u> GED	<u>10</u> CDP	<u>13</u> ESL
Increased Class Size: 16 (n=31)	<u>13</u> ABE	<u>9</u> GED	<u>8</u> CDP	<u>11</u> ESL

4. What are the current sizes of your mandated adult education program classes? In general, what

would you like your average class size to be for each type of program?

	ABE	GED	CDP	ESL
Smallest Class Size (Number)				
Largest Class Size (Number)				
Actual Average Class Size (Number)	1.5-25	1.5-34.5	7-26	6-30
(range of responses)	(n=31)	(n=34.5)	(n=22)	(n=32)
Goal Average Class Size (Number)				

- 5. What is your policy regarding participation in your mandated adult education programs by individuals who are not residents of your school district(s)? Check one:
- 14 (n=33) Allow any nonresident to participate without charge if space is available
- 3 (n=33) Allow any nonresident to participate if space is available and charge nonresident's town
- 7 (n=33) Do not allow nonresidents to participate
- 9 (n=33) Other (please explain) e.g., allow if work in town; allow if live in other town but near site, etc.

6. In general, when are your mandated adult education classes available?

	Offered Daytime? 29 yes (n=32)	Offered Evening? 32 yes (n=32)	Offered Weekend? 6 yes (n=32)	Offered Summer? 23 yes (n=32)
ABE Classes	Yes No	YesNo	YesNo	Yes No
GED Classes	Yes No	YesNo	YesNo	Yes No
CDP Classes	Yes No	Yes No	Yes No	Yes No
ESL Classes	YesNo	YesNo	Yes No	Yes No

7. At present, how many staff do you employ for your mandated adult education programs?

	Total Number	Number Full-Time (18 no FT positions)
Number Teachers (range)	2-82 (n=33)	0-27 (n=33); 22 no FT teachers
Number Counselors (range)	0-15 (n=33)	0-3 (n=33); 23 no FT counselors

8. Do you offer any adult education classes or programs targeted for adults with special needs (e.g., free
adult special education classes, basic education instruction for deaf or hearing impaired adults,
community living courses for adults with developmental disabilities, etc.)? 19 no 12 yes (n=31)
If yes, please describe:

APPENDIX K

Workforce Challenges Facing Connecticut Highlights from "Connecticut Demographics and Economics" by the Office of Workforce Competitiveness (OWC)³

"The global transition to knowledge economy raises levels of skills needed in workplace ... a strong foundation in math, science, literacy skills and technology is critical." (p. 5)

"Connecticut's economy must be fueled by innovation and skilled talent to remain competitive and will depend heavily on ..."

- research and development, venture capital, technology transfer and commercialization
- skills upgrading for existing workers, especially older workers staying on the job longer
- increased numbers of graduates in math, science, technology and engineering fields (p. 66).

According to OWC, the combination of Connecticut's economic and demographic profiles, in light of the worldwide movement from an industrial economy to an information-based economy, present a significant challenges to generating and retaining the skilled workforce the state needs to be competitive. Among the most significant concerns are: no population growth; barely any workforce growth, with most increases due to immigration; an aging population; a net loss of young, entry-level workers (college-age up to age 34); and the fact much of tomorrow's available workforce will come from areas of high poverty. Poverty remains a critical factor affecting academic achievement. Low graduation rates among minority students and significantly lower student performance on state tests in urban districts mean many individuals in state's "talent pipeline" will be unprepared for and lack the minimum skills levels needed in a knowledge-based economy.

A Demographic Snapshot

- Connecticut ranks:
 - 45th in total population growth
 - 10th in the percentage of residents age 65 and older
 - 18th in projected population growth to 2025, with a 0.0% expected growth rate over the period
 - 7th oldest state in the nation, with a median age 38.5 in 2003 and projected to reach 40 by 2008
 - 14th in the percentage of the population made up of immigrants and 12th in projected increase through 2025
 - 4th in exportation of college-bound students, and a "net exporter" of college students
 - 23rd in projected high school graduates over the period 2002-2018
- By 2010, those over age 45 will represent 40 percent of Connecticut's workforce.
- There are more individuals over 62 than there are teenagers in Connecticut and twice as many households without school-aged children as those with.
- The 20-34 age cohort in Connecticut declined at roughly twice the national average between 1990 and 2000 (over 20% compared to 12%).
- Student in poor communities, compared to the statewide average, are:
 - 17 times more likely to drop out of high school; and
 - 9 times less likely to pass the 10th grade Connecticut Academic Performance Test CAPT).
